

# DISCOVER THE SECRET TO HIGH-TECH SUCCESS

Receive a *First Class* Educational  
Experience from the Only Laser and  
Imaging Organization in the World.

Learn About Lasers, 3D Imaging and CAD/CAM at the WCLI Quebec Symposium  
**FAIRMONT LE CHÂTEAU FRONTENAC, QUÉBEC CITY • JUNE 13 - 15, 2014**

The World Clinical Laser and Imaging Institute is a closely knit network of thousands of dental professionals who share a passion for improving the patient experience and building the best possible practice. Join us at the Laser and Imaging Symposium in Quebec City, June 13-15. Complete with two tracks of cutting edge dental curriculum and the chance to **earn 14 CE credits**, you don't want to miss this event.

## SYMPOSIUM HIGHLIGHTS:

- **Personal, hands-on instruction** for all-tissue and diode lasers, 3D CBCT and intraoral scanners.
- Learn protocols for **patient friendly laser procedures** for periodontics, endodontics and more.
- Learn how to **start your own 3D imaging center** inside your existing dental practice.

Courses catered to both new & experienced users.

Register before May 31, 2014 and **SAVE \$100** on Doctor Tuition. Visit [www.wcli.org](http://www.wcli.org) to sign up today.

## ***Address Nervous Tongue & Cheek Biting*** ***Cut Teeth with No Anesthetic\****

Cutting teeth and performing cavity preps with no anesthetic makes even your youngest patients sit up in the chair and say, ***“Wow! That’s it?!”*** Easily treat hard and soft tissue with one instrument, begin offering WaterLase treatments in your practice today.

- 97% of patients recommend it to their family & friends<sup>1</sup>.
- Faster visits with no wait for anesthetic.
- Work in all four quadrants in a single visit.
- Cuts teeth as fast as a high speed.

2. Independent research by Richter<sup>7</sup>, 2005. Data on file.

† ‘Cut Teeth Without Anesthetic’ is not a claim of clinical efficacy. Discomfort is based on individual sensitivity to pain, and other factors. Not all patients can be treated painlessly without anesthetic. However, dentists using WaterLase to perform typical cavity preparations report not using anesthetic in the majority of cases.
