

UPGRADE TO 360° SUPPORT FOR YOUR LASER TECHNOLOGY

As a Hoya dentist, it is increasingly difficult to service your older technology. The world leader in dental lasers, BIOLASE, would like to offer you an opportunity to upgrade your laser technology.

Trade in your current Hoya laser and trade up to WaterLase technology!

Compared to Hoya lasers, the WaterLase iPlus has:

- 360° support for installation, service and parts.
- Patented radial firing tips for high ROI Endo and Perio treatments.
- Cut hard tissue 250% faster.
- Easy to use, intuitive graphical interface.
- 25+ local field service experts across the US and Canada for immediate support.

Manufactured in the US with over 25 years dental laser experience, you can count on BIOLASE to be your dependable technology partner.

waterlase*iPlus*

"Prior to my investment in the Waterlase iPlus dual wavelength laser, I'd been using an Erbium laser for the last six years. If anyone ever thought of upgrading, now's the time. My iPlus enables me to contour hard and soft tissues much quicker and with less trauma than I ever could with my previous laser!"
